Subject: SB 574

Hello,

Please include my thoughts on SB 574 for the official record. I have serious concerns about this bill. I am opposed to traditional public schools sharing money raised by regional enhancement millages with charter schools.

Traditional public schools and charter schools are not held to equal standards. Charters do not have to pay for busing students. Charters are allowed to refusing enrolling students. Charters can refuse students with special needs. Too often charter schools close leaving students and parents floundering. Additionally, why would public funds be shared with charters when their school boards are not elected by the public? Furthermore, why would for profit charters be allowed to share in millage revenues?

Thank you,

Jason Posey
